REACH EU regulation

Dear business partner

Regulation EC 1907/2006 for the registration, evaluation and authorisation of chemicals (REACH) came into force in June 2007. Anyone who puts products containing more than 0.1% by weight of «substances of very high concern» (SVHC) into circulation, must inform the purchaser/customer of this and provide them with safe handling information (safety data sheet). Products which may contain SVHC materials are listed in attachment XIV of the REACH regulation. An up to date list can be viewed on the internet.

Supported by our half-finished product suppliers we can confirm that we neither use the materials on this SVHC candidate list nor exceed the limit of 0.1% by weight.

Yours Sincerely

METAFLON AG

Beat Loner
Manager
